PERSON 1: Common Core is a good program because the biggest problem facing our education system is high school graduates not having the skills and knowledge to succeed in college or in their careers, and a single set of rigorous standards will help American students compete in a global economy.

PERSON 2: Common Core is a bad program because it emphasizes rote memorization through standardized tests and sets a blanket federal policy, subject to bureaucrats and special interests, and it discourages teachers to be creative and innovative in the classroom.
